Approximate B-shape closure 2.0mm, staple dimension 4 x 4.8mm, staple gauge 0.28mm.

To be used with 010460 reusable stainless steel linear stapler code.

### ■ **015477L** blue TA PREMIUM\* 90 3.5

90mm disposable loading unit for TA 90 Premium\* reusable stainless steel linear stapler. It places two staggered rows of titanium staples.

Approximate B-shape closure 1.5mm, staple dimension 4 x 3.5mm, staple gauge 0.23mm.

To be used with 010470 reusable stainless steel linear stapler code.

### ■ 015485L green TA PREMIUM\* 90 4.8

90mm disposable loading unit for TA 90 Premium\* reusable stainless steel linear stapler. It places two staggered rows of titanium staples.

Approximate B-shape closure 2.0mm, staple dimension 4 x 4.8mm, staple gauge 0.28mm.

To be used with 010470 reusable stainless steel linear stapler code.

## **PREMIUM POLYSORB\* 55**

Disposable loading unit for reusable stainless steel TA PREMIUM\* linear stapler with LACTOMER\* 9-1 absorbable staples

LACTOMER\* 9-1 is a copolymer of glycolide and lactide.

6 units per box

Order Color Code Code Description

## ■ 013501L aqua PREMIUM POLYSORB\* 55-.060

55mm disposable loading unit for 55mm reusable stainless steel TA PREMIUM\* linear stapler. It places a double-staggered row

of absorbable LACTOMER\* 9-1 staples.

Approximate closure: 1.5mm (.060 inches).

To be used with 010460 reusable stainless steel linear stapler code.

## ■ 013505L beige PREMIUM POLYSORB\* 55-.170

### (to be discontinued, replacement code **013602**)

55 mm disposable loading unit for 55 mm TA PREMIUM\* reusable stainless steel linear stapler. It places a double-staggered row

of absorbable LACTOMER\* 9-1 staples.

Approximate closure: 4.3mm (.170 inches).

To be used with 010460 reusable stainless steel linear stapler code.

## ■ 013507L brown PREMIUM POLYSORB\* 55-.200

### (to be discontinued, replacement code **013601**)

55mm disposable loading unit for 55mm TA PREMIUM\* reusable stainless steel linear stapler. It places a double-staggered row

of absorbable LACTOMER\* 9-1 staples.

Approximate closure: 5mm (.200 inches).

To be used with 010460 reusable stainless steel linear stapler code.

## TA 90 B PREMIUM\* and TA 90 BN PREMIUM\*

Reusable stainless steel linear stapler 1 unit per box

Order Color Code Code Description

## **010884** TA 90 B PREMIUM\*

Reusable stainless steel TA 90 B PREMIUM\*, 90mm linear stapler for bariatric surgery. The stapler places four equidistant staggered rows of titanium staples. To be used with 015888L dlu code.

#### 010885

#### **TA 90 BN PREMIUM\***

Reusable stainless steel TA 90 BN PREMIUM\*, 90mm linear stapler with notch for bariatric surgery. The stapler places four equidistant staggered rows of titanium staples. The notched instrument head of the TA 90 BN PREMIUM\* creates a channel 1 cm wide upon activation of disposable loading unit.

To be used with 015888L dlu code.

## TA 90 B PREMIUM\* and TA 90 BN PREMIUM\*

Disposable loading unit for reusable stainless steel linear stapler TA 90 B PREMIUM\* and TA 90 BN PREMIUM\* with titanium staples 6 units per box

Order Color Code Code Description

■ **015888L** green TA 90 B\*- 4.8

90mm disposable loading unit for TA 90 B PREMIUM\* and TA 90 BN PREMIUM\* reusable stainless steel linear stapler for bariatric surgery, reloadable.

The stapler places four staggered rows of titanium staples.

B-shape closed staple 2.0mm, staple dimension 4 x 4.8mm.

To be used with 010884 and 010885 reusable stainless steel linear stapler codes.

### ROTICULATOR\*

Single Use Articulating linear stapler with titanium staples 3 units per box

Order Color Code Code Description

■ 017615 blue ROTICULATOR\* 30-3.5

30mm single use articulating and roticulating linear stapler.

It places a double-staggered row of titanium staples.

Instrument jaws articulating 120° and instrument shaft rotating 320°.

Approximate B-shaped closure: 1.5mm, staple dimension 4 x 3.5mm.

## ■ 017617 green ROTICULATOR\* 30-4.8

30mm single use articulating and roticulating linear stapler. It places a double-staggered row of titanium staples. Instrument jaws articulating  $120^{\circ}$  and instrument shaft rotating  $320^{\circ}$ . Approximate B-shaped closure: 2.0mm, staple dimension  $4 \times 4.8$ mm.

#### □ **017619** white ROTICULATOR\* 30 V-3

Vascular 30mm single use articulating and roticulating linear stapler. It places a double-staggered row of titanium staples. Instrument jaws articulating  $120^{\circ}$  and instrument shaft rotating  $320^{\circ}$ . Approximate B-shaped closure: 1.0mm, staple dimension  $3 \times 2.5$ mm.

## ■ **017612** blue ROTICULATOR\* 55-3.5

55mm single use articulating and roticulating linear stapler. It places a double-staggered row of titanium staples. Instrument jaws articulating  $120^{\circ}$  and instrument shaft rotating  $320^{\circ}$ . Approximate B-shaped closure: 1.5mm, staple dimension  $4 \times 3.5$ mm.

#### ■ 017614 green ROTICULATOR\* 55- 4.8

55mm single use articulating and roticulating linear stapler. It places a double-staggered row of titanium staples. Instrument jaws articulating  $120^{\circ}$  and instrument shaft rotating  $320^{\circ}$ . Approximate B-shaped closure: 2.0mm, staple dimension  $4 \times 4.8$ mm.

### **ROTICULATOR 55 POLY\***

Single Use Articulating linear stapler with LACTOMER\* 9-1 absorbable staples LACTOMER\* 9-1 is a copolymer of glycolide and lactide. 3 units per box

| Order | Color |             |

## **013602** tan ROTICULATOR 55 POLY\* -.170

55 mm single use linear stapler with LACTOMER\* 9-1 absorbable staples. It places a double-staggered 53 mm long row of absorbable LACTOMER\* 9-1 staples. Approximate B-shaped closure: 4.3mm, staple dimension 4 x 6.6mm. Instrument jaws articulating  $120^{\circ}$  and instrument shaft rotating  $320^{\circ}$ .

#### ■ **013601** brown ROTICULATOR 55 POLY\* -.200

55 mm single use linear stapler with LACTOMER\* 9-1 absorbable staples. It places a double-staggered 53 mm long row of absorbable LACTOMER\* 9-1 staples. Approximate B-shaped closure: 5.0 mm, staple dimension  $4 \times 6.6 mm$  Instrument jaws articulating  $120^{\circ}$  and instrument shaft rotating  $320^{\circ}$ .

### PREMIUM POLY CS\* - 57

Single Use linear stapler with LACTOMER\* 9-1 absorbable staples.

LACTOMER\* 9-1 is a copolymer of glycolide and lactide.

3 kits per box - 2 instruments per kit

Order Color
Code Code Description

## □ **015140** white PREMIUM POLY CS\*-57-.140

57mm single use linear stapler with LACTOMER\* 9-1 absorbable staples used for creating a temporary opening, such as a hysterotomy made during a cesarean section. It places 20 absorbable copolymer LACTOMER\* 9-1 staples on a double-staggered row with cutting knife in between. Approximate B-shaped closure: 3.6mm (.140 inches), staple dimension 4.85 x 5.15mm.

#### **015170** tan PREMIUM POLY CS\*-57-.170

57mm single use linear stapler with LACTOMER\* 9-1 absorbable staples used for creating a temporary opening, such as a hysterotomy made during a cesarean section. It places 20 absorbable copolymer LACTOMER\* 9-1 staples on a double-staggered row with cutting knife in between. Approximate B-shaped closure: 4.3mm (.170 inches), staple dimension 4.85 x 5.15mm.

#### PI\*

Disposable reloadable linear stapler with titanium staples and in-line handle to be discontinued

3 units per box

Order Color
Code Code Description

#### ■ 4900T blue PI\* 30 3.5 Medium

30mm disposable reloadable (3 reloadings, for a total of 4 firings) linear stapler. It places two staggered rows of titanium staples.

Approximate B-shape closure: 1.5mm, staple dimension 4 x 3.5mm, staple gauge 0.23mm.

To be used with 4907T and 4908T dlu codes.

### ■ 4901T green PI\* 30 4.8 Large

30mm disposable reloadable (3 reloadings, for a total of 4 firings) linear stapler. It places two staggered rows of titanium staples.

Approximate B-shape closure: 2.0mm, staple dimension 4 x 4.8mm, staple gauge 0.30mm.

To be used with 4907T and 4908T dlu codes.

### PI\*

Disposable loading unit for PI\* disposable linear stapler with titanium staples. to be discontinued

6 units per box

Order Color Code Code Description

■ 4907T blue PI\* 30 3.5 Medium

30mm disposable loading unit for PI\* 30 linear stapler.

It places two staggered rows of titanium staples.

Approximate B-shape closure 1.5mm, staple dimension 4 x 3.5mm, staple gauge 0.23mm.

To be used with 4900T and 4901T disposable linear stapler codes.

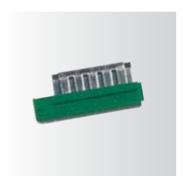

## ■ 4908T green PI\* 30 4.8 Large

30mm disposable loading unit for PI\* 30 linear stapler.

It places two staggered rows of titanium staples.

Approximate B-shape closure 2.0mm, staple dimension 4 x 4.8mm, staple gauge 0.30mm.

To be used with 4900T and 4901T disposable linear stapler codes.

## PI\*

Disposable loading unit with stainless steel staples for use with PI\* Reusable Stainless Steel Instruments (ex codes 3960 and 3961)

Order Color Code Code Description

#### 3923L PI\* 30 3.5 Medium

30mm disposable loading unit for Reusable stainless steel PI\* Standard Stapler Set. It places 11 stainless steel staples on two staggered rows 31.4mm long. Approximate B-shape closure 1.5mm, staple dimension 4 x 3.5mm, staple gauge 0.23mm.

6 units per box

## **3924L** PI\* 30 4.8 Large

30mm disposable loading unit for Reusable stainless steel PI\* Standard Stapler Set. It places 11 stainless steel staples on two staggered rows 31.4mm long. Approximate B-shape closure 2.0mm, staple dimension 4 x 4.8mm, staple gauge 0.30mm.

6 units per box

## **3925L** PI\* 30 V-3 Vascular

Vascular 30mm disposable loading unit for Reusable stainless steel PI\* Standard Stapler Set. It places 15 stainless steel staples on three staggered rows 30.9mm long. Approximate B-shape closure 1.0mm, staple dimension 3 x 2.5mm, staple gauge 0.21mm.

6 units per box

## 3926L

#### PI\* 55 3.5 Medium

55mm disposable loading unit for Reusable stainless steel PI\* Standard Stapler Set. It places 19 stainless steel staples on two staggered rows 53.3mm long. Approximate B-shape closure 1.5mm, staple dimension 4 x 3.5mm, staple gauge 0.23mm.

6 units per box

#### 3927L

## PI\* 55 4.8 Large

55mm disposable loading unit for Reusable stainless steel PI\* Standard Stapler Set. It places 19 stainless steel staples on two staggered rows 53.3mm long. Approximate B-shape closure 2.0mm, staple dimension 4 x 4.8mm, staple gauge 0.30mm.

#### 3930A

#### PI\* 90 4.8 Large

90mm disposable loading unit for Reusable stainless steel PI\* Standard Stapler Set. It places 33 stainless steel staples on two staggered rows 91.5mm long. Approximate B-shape closure 2.0mm, staple dimension 4 x 4.8mm, staple gauge 0.30mm.

To be used with 4912T and 4913T dlu codes.

12 units per box

### TA\*

Disposable reloadable linear stapler with directional stapling technology (DST\*) titanium staples

3 units per box

To be used with TA9035S and TA9048S linear stapler codes.

## **MULTIFIRE GIA\***

Disposable reloadable linear stapler for resection, transection and anastomosis with titanium staples

#### to be discontinued

3 units per box

Order Color

Code Code Description

#### **☐ 030523** white MULTIFIRE GIA\* 60-2.5

60mm vascular stapler for resection, transection and anastomosis places two double-staggered rows of titanium staples and simultaneously the knife divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure: it can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 2.5mm

Staple gauge: 0.21mm

Approximate B-shape closure: 1.0mm

Tissue Gap Control Mechanism for perfect staple formation.

Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes 030525L, 030678L and 030912L.

#### ■ **030676** blue MULTIFIRE GIA\* 60 3.8

60mm stapler for resection, transection and anastomosis places two double-staggered rows of titanium staples and simultaneously the knife divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure: it can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 3.85mm

Staple gauge: 0.24mm

Approximate B-shape closure: 1.5mm

Tissue Gap Control Mechanism for perfect staple formation. Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes 030525L,

030678L and 030912L.

#### ■ **030902** black MULTIFIRE SGIA\* 60-3.8

60mm knifeless stapler places two double-staggered rows of titanium staples.

The instrument is designed for multiple use during a single surgical procedure:

it can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 3.85mm

Staple gauge: 0.24mm

Approximate B-shape closure: 1.5mm

The stapler can be used with disposable loading unit code 030912L.

#### **031738** blue MULTIFIRE GIA\* 80 3.8

80mm stapler for resection, transection and anastomosis places two double-staggered rows of titanium staples and simultaneously the knife divides the tissue between the two double rows.

The instrument is designed for multiple use during a single surgical procedure: it can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 3.85mm

Staple gauge: 0.24mm

Approximate B-shape closure: 1.5mm

Tissue Gap Control Mechanism for perfect staple formation. Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes 031739L and 031749L.

## ■ **031748** green MULTIFIRE GIA\* 80 4.8

Staple gauge: 0.24mm

Approximate B-shape closure: 1.5mm

The disposable loading unit can be used with the handle unit code, 030403, 030449 and FGIAUNIVXI.

# ■ 030459 green ENDO GIA\*

#### **UNIVERSAL Roticulator 60 4.8**

60 mm articulating single use  $\,$  loading unit for the GIA\* UNIVERSAL stapler.

The stapler places two triple-staggered rows of titanium staples (60mm) and simultaneously the knife divides the tissue in between.

The disposable loading unit can articulate at 22° and 45° in both directions.

Size of open staple: 3 x 4.8mm

Staple gauge: 0.24mm

Approximate B-shape closure: 2.0mm

Shaft diameter: 15mm

The disposable loading unit can be used with the handle unit code, 030403,

030449 and EGIAUNIVXL.

For use with Versaport 15mm trocar code 178079. Under development.

#### NG GIA\*

Disposable reloadable linear stapler with titanium Directional Stapling Technology (DST\*) for resection, transection and anastomosis.

3 units per box

Order Code

de Description

#### ☐ GIA6025S white GIA\* 60-2.5

The 60 mm vascular stapler for resection, transection and anastomosis, places a two double-staggered rows of DST\* staples and simultaneously divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure.

It can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 2.5 mm

Approximate B-shape closure: 1.0 mm

Directional Stapling Technology for perfect B-shape staple formation

Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes GIA6025L, GIA6038L and GIA 6048L.

#### ■ GIA6038S blue GIA\* 60-3.8

The 60 mm stapler for resection, transection and anastomosis, places a two double-staggered rows of DST\* staples and simultaneously divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure.

It can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 3.85 mm Approximate B-shape closure: 1.5 mm

Directional Stapling Technology for perfect B-shape staple formation

Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes GIA6025L, GIA6038L and GIA 6048L.

#### **KGIA6038S**

#### KGIA\* 60-3.8 knifeless

The 60 mm knifeless stapler, places a two double-staggered rows of DST\* staples.

Size of open staple: 3 x 3.85 mm Approximate B-shape closure: 1.5 mm

Directional Stapling Technology for perfect B-shape staple formation

The KGIA instrument does not contain a knife.

#### ■ GIA6048S green GIA\* 60-4.8

The 60 mm stapler for resection, transection and anastomosis, places a two double-staggered rows of DST\* staples and simultaneously divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure.

It can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 4.85 mm Approximate B-shape closure: 2.0 mm

Directional Stapling Technology for perfect B-shape staple formation

Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes GIA6025L, GIA6038L and GIA 6048L

#### **GIA8038S** blue GIA\* 80-3.8

The 80mm stapler for resection, transection and anastomosis, places a two double-staggered rows of DST\* staples and simultaneously divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure.

It can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 3.85 mm Approximate B-shape closure: 1.5 mm

Directional Stapling Technology for perfect B-shape staple formation

Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes GIA8038L and GIA8048L.

#### ■ GIA8048S green GIA\* 80-4.8

The 80 mm stapler for resection, transection and anastomosis, places a two double-staggered rows of DST\* staples and simultaneously divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure.

It can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 4.85 mm Approximate B-shape closure: 2.0 mm

Directional Stapling Technology for perfect B-shape staple formation

Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes GIA8038L and GIA8048L.

#### ■ GIA10038S blue GIA\* 100-3.8

The 100 mm stapler for resection, transection and anastomosis, places a two double-staggered rows of DST\* staples and simultaneously divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure.

It can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 3.85 mm Approximate B-shape closure: 1.5 mm

Directional Stapling Technology for perfect B-shape staple formation

Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes GIA10038L and GIA10048L

# ■ GIA10048S green GIA\* 100-4.8

The 100 mm stapler for resection, transection and anastomosis, places a two double-staggered rows of DST\* staples and simultaneously divides the tissue in between the two double rows.

The instrument is designed for multiple use during a single surgical procedure. It can be reloaded up to 7 times for a total of 8 applications.

Size of open staple: 3 x 4.85 mm Approximate B-shape closure: 2.0 mm

Directional Stapling Technology for perfect B-shape staple formation

Each Disposable Loading Unit contains a fresh push-bar knife.

The stapler can be used with disposable loading unit codes  $\,$  GIA10038L and  $\,$  GIA10048L

Each Disposable Loading Unit contains a fresh push-bar knife.

The disposable loading unit can be used with the GIA stapler codes GIA10038S and GIA10048S.

#### PREMIUM PLUS CEEA\*

Single use curved circular stapler with TILT TOP\* anvil and titanium staples. 3 units per box

Order Color Code Description

# ■ 111983 aqua PREMIUM PLUS CEEA\* 21

The single use PREMIUM PLUS CEEA\* circular stapler places two-staggered circular rows of titanium staples. Following the staple formation a knife blade in the instrument resects the tissue, creating a circular anastomosis.

Low profile anvil for easier and atraumatic insertion. No TILT TOP\* anvil.

External diameter: 20.8mm and internal lumen: 11.8mm.

Shaft length: 28cm.

Size of open staple: 4 x 4.8 Staple gauge: 0.28mm

Approximate B-shape closure: 2.0mm.

## ☐ 111985 white PREMIUM PLUS CEEA\* 25

The single use PREMIUM PLUS CEEA\* circular stapler places two-staggered circular rows of titanium staples. Following the staple formation a knife blade in the instrument resects the tissue, creating a circular anastomosis.

Low profile TILT TOP\* anvil for easier atraumatic insertion and removal.

External diameter: 24.8mm and internal lumen: 15.3mm.

Shaft length: 28cm.

Size of open staple: 4 x 4.8 Staple gauge: 0.28mm

Approximate B-shape closure: 2.0mm.

# ■ 111987 blue PREMIUM PLUS CEEA\* 28

The single use PREMIUM PLUS CEEA\* circular stapler places two-staggered circular rows of titanium staples. Following the staple formation a knife blade in the instrument resects the tissue, creating a circular anastomosis.

Low profile TILT TOP\* anvil for easier atraumatic insertion and removal.

External diameter: 28.4mm and internal lumen: 18.2mm.

Shaft length: 28cm.

Size of open staple: 4 x 4.8 Staple gauge: 0.28mm

Approximate B-shape closure: 2.0mm.

# ■ 111989 green PREMIUM PLUS CEEA\* 31

The single use PREMIUM PLUS CEEA\* circular stapler places two-staggered circular rows of titanium staples. Following the staple formation a knife blade in the instrument resects the tissue, creating a circular anastomosis.

Low profile TILT TOP\* anvil for easier atraumatic insertion and removal.

External diameter: 31.5mm and internal lumen: 21.4mm.

Shaft length: 28cm.

Size of open staple: 4 x 4.8 Staple gauge: 0.28mm Approximate closure: 2.0mm.

# 111981 yellow PREMIUM PLUS CEEA\* 34

The single use PREMIUM PLUS CEEA\* circular stapler places two-staggered circular rows of titanium staples. Following the staple formation a knife blade in the instrument resects the tissue, creating a circular anastomosis.

Low profile TILT TOP\* anvil for easier atraumatic insertion and removal.

External diameter: 34mm and internal lumen: 23.8mm.

Shaft length: 28cm.

Size of open staple: 4 x 4.8 Staple gauge: 0.28mm

Approximate B-shape closure: 2.0mm.

# **EEA**\*

Stainless steel reloadable straight circular stapler.

1 unit per box

Order

Code

Description

#### 020280

EEA\* with three disposable

PURSTRING\* 65mm devices

The EEA\* stainlees steel straight circular stapler places two-staggered circular rows of titanium staples. Following the staple formation a knife blade in the instrument resect the excess tissue, thus creating a circular anastomosis.

The wire of the staple line is determined by the selection of the disposable loading unit used.

It is sold complete with three PURSTRING\* 65 single use instruments (code 020242).

The stapler can be loaded with disposable loading unit code 110214L, 110238L and 110276L.

# EEA\*

Disposable loading unit for stainless steel reloadable straight circular stapler with titanium staples.

6 units per box

Order Color Code Code Description

## ☐ 110214L white EEA\* 25

25mm disposable loading unit for EEA\* stainless steel straight circular stapler. It places two-staggered circular rows of titanium staples.

Following the staple formation a knife blade in the instrument resects the tissue, creating a circular anastomosis.

External diameter: 24.8mm and internal lumen: 15.3mm.

Size of open staple: 4 x 4.8 Staple gauge: 0.25mm Approximate closure: 2.0mm.

The disposable loading unit can be used with the stainless steel stapler code

020280 and 020210.

# ■ 110238L blue EEA\* 28

28mm disposable loading unit for EEA\* stainless steel straight circular stapler. It places two-staggered circular rows of titanium staples.

Following the staple formation a knife blade in the instrument resects the tissue, creating a circular anastomosis.

External diameter: 28.4mm and internal lumen: 18.2mm.

Size of open staple: 4 x 4.8 Staple gauge: 0.25mm Approximate closure: 2.0mm.

The disposable loading unit can be used with the stainless steel stapler code

020280 and 020210.

#### ■ 110276L green EEA\* 31

31mm disposable loading unit for EEA\* stainless steel straight circular stapler. It places two-staggered circular rows of titanium staples.

Following the staple formation a knife blade in the instrument resects the tissue, creating a circular anastomosis.

External diameter: 31.5mm and internal lumen: 21.4mm.

Size of open staple: 4 x 4.8 Staple gauge: 0.25mm Approximate closure: 2.0mm.

The disposable loading unit can be used with the stainless steel stapler code

020280 and 020210.

# **PURSTRING\***

Disposable instrument to create an automatic purse-string with stainless steel staples.

3 units per box

Order Code

Description

#### 020242

#### **PURSTRING\* 65**

The disposable Purse-string instrument automatically places a circumferential strand of 65mm 2-0 MONOSOF\* monofilament polyammide suture throught 28 stainless steel staples.

The stainless steel staples are attaching the suture to the structure or organ where a purse-string placement is desired.

#### 020730

#### **PURSTRING\* 45 - CARDIAC**

The disposable Purse-string instrument automatically places a circumferential strand of 2-0 SURGIDAC\* non-absorbable braided polyester suture throught 18 stainless steel staples.

The stainless steel staples are attaching the suture to the structure or organ where a purse-string placement is desired.

# **STRAM DEVICE**

Sapimed Trans-Anal Mucosectomy: disposable kit to perform transanal stapled mucoprolapsectomy to resect internal prolapsed haemorrhoids.

21 units per box

Order Code

# 6

#### **STRAM**

Disposable device for transanal stapled mucohaemorrhoidectomy. The kit is composed by an anal valve (21mm diameter) complete with spatula, a stapler introducer with petals and the quadriject device (to be used in case of local anesthesia). The 21mm valve allows atraumatic exploration, the peanut window allows pursestring placement using 5/8 circle needles, ensuring the correct bite of tissue to be incorporated.

The petal introducer protects the anal sphincter during the stapler insertion. Operative field lighting, transparent operative fanlight and graduated valve.

#### STRAM 34

Disposable device for transanal stapled mucohaemorrhoidectomy. The kit is composed by an anal valve (21mm diameter) complete with spatula, a stapler introducer with petals and the quadriject device (to be used in case of local anesthesia). The 21mm valve allows atraumatic exploration, the peanut window allows pursestring placement using 5/8 circle needles, ensuring the correct bite of tissue to be incorporated.

The petal introducer protects the anal sphincter during the stapler insertion.

Operative field lighting, transparent operative fanlight and graduated valve.

STRAM and PREMIUM PLUS PCEEA\* 34 are packaged together in a custom kit.

# LDS\*

# MULTIFIRE VersaTack\*

Disposable, reloadable stapler, with titanium staples for mesh fixation in herniorraphy procedures.

6 units per box

Order Color
Code Code Description

# ■ 174021 blue MULTIFIRE VersaTack\*

The MULTIFIRE VersaTack\* stapler contains 10 titanium staples. The instrument places one staple each time the handle is squeezed. The staple legs first penetrate the tissue or mesh and then fully form, thus anchoring or approximating the tissue and/or the mesh. The stapler can be loaded four times for a maximum of fifty firings with disposable loading units codes 174015 and 174007. The disposable loading unit of the stapler contains 10 titanium staples size 0,38mm x 0,51mm (0,015" x 0.020"). The staple span approximately 8.5mm before closure. The length of the staple leg is approximately 4mm before closure and 2.5mm when closed.

#### ■ 174023 black MULTIFIRE VersaTack\*

The MULTIFIRE VersaTack\* stapler contains 10 titanium staples. The instrument places one staple each time the handle is squeezed. The staple legs first penetrate the tissue or mesh and then fully form, thus anchoring or approximating the tissue and/or the mesh. The stapler can be loaded four times for a maximum of fifty firings with disposable loading units codes 174015 and 174007.

The disposable loading unit of the stapler contains 10 titanium staples size  $0.38 \text{mm} \times 0.51 \text{mm} (0.015\text{"} \times 0.020\text{"})$ .

The staple span approximately 8.5mm before closure.

The length of the staple leg is approximately 4.8mm before closure and 3.0mm when closed.

# **MULTIFIRE ENDO HERNIA\***

Disposable loading unit for MULTIFIRE VersaTack\*, ENDO UNIVERSAL\* 65 and MULTIFIRE ENDO HERNIA\*  $0^{\circ}$  reloadable stapler, with titanium staples for mesh fixation in herniorraphy procedures.

#### **LAPRO-CLIP\***

Reusable stainless steel laparoscopic clip applier with absorbable LAPRO-CLIP\* clips.

Order Color Code Code Description

#### 8886848700

#### LAPRO-CLIP\*

#### LAPAROSCOPIC CLIP APPLIER

Reusable stainless steel laparoscopic clip applier with absorbable LAPRO-CLIP\* clips.

Shaft length: 26.5cm.

The two pieces absorbable clip is made of an external polyglycolic acid (DEXON\*) body that runs over a flexible internal polygliconate (MAXON\*) part.

The clip applier can be used with the disposable loading unit code 8886848808, 8886848812, 8886848882, 8886848813.

#### 8886848798

#### LAPRO-CLIP\* Short

Reusable device for removing LAPRO-CLIP\* clips.

1 unit per box

Reusable stainless steel clip applier with absorbable LAPRO-CLIP\* clips.

The two pieces absorbable clip is made of an external polyglycolic acid (DEXON\*) body that runs over a flexible internal polygliconate (MAXON\*) part.

The clip applier can be used with the disposable loading unit code 8886848808, 8886848812, 8886848882, 8886848813.

#### 8886848400

#### LAPRO-CLIP\*

#### LAPAROSCOPIC MULTIPLE CLIP APPLIER

Reusable stainless steel laparoscopic clip applier with absorbable LAPRO-CLIP\* clips.

The two pieces absorbable clip is made of an external polyglycolic acid (DEXON\*) body that runs over a flexible internal polygliconate (MAXON\*) part.

The clip applier can be used with the disposable loading unit code 8886848508.

#### LAPRO-CLIP\*

Disposable loading unit absorbable LAPRO-CLIP\* clip applier.

Order Color Code Code Description

#### 8886848808

#### **LAPRO-CLIP\* CLIP**

Disposable loading unit for LAPRO-CLIP\* clip applier.

The absorbable Medium/Large size (8mm) clip is made of an external polyglycolic acid (DEXON\*) body that runs over a flexible internal polygliconate (MAXON\*) part. 6 clip units for one sterile box, 6 boxes in a carton.

The disposable loading unit can be used with the clip applier unit code 8886848700, 8886848798 and the extractor 8886848799.

#### 8886848508

#### **LAPRO-CLIP\* MULTI LOADING UNIT**

Automatic disposable loading unit for LAPRO-CLIP\* multiple clip applier.

Each loading unit contains 8 LAPRO-CLIP\* clips.

5 unit per box

The disposable loading unit can be used with code 8886848400.

#### 8886848799

#### **LAPRO-CLIP\* CLIP REMOVER**

Reusable device for removing LAPRO-CLIP\* clips.

1 unit per box

#### **8886848812** LAPRO-CLIP\* CLIP

Disposable loading unit for LAPRO-CLIP\* clip applier.

The absorbable large (12mm) size clip is made of an external polyglycolic acid (DEXON\*) body that runs over a flexible internal polygliconate (MAXON\*) part. 6 clip units for one sterile box, 6 boxes in a carton.

The disposable loading unit can be used with the clip applier unit code 8886848700, 8886848798 and the extractor 8886848799.

#### 8886848882

#### LAPRO-CLIP\* CLIP

Disposable loading unit for LAPRO-CLIP\* clip applier.

The absorbable medium-large size (8mm) clip is made of an external polyglycolic acid (DEXON\*) body that runs over a flexible internal polygliconate (MAXON\*) part. 2 clip units for one sterile box, 10 boxes in a carton.

The disposable loading unit can be used with the clip applier unit code 8886848700, 8886848798 and the extractor 8886848799.

#### 8886848813

#### LAPRO-CLIP\* CLIP

Disposable loading unit for LAPRO-CLIP\* clip applier.

The absorbable large (12mm) size clip is made of an external polyglycolic acid (DEXON\*) body that runs over a flexible internal polygliconate (MAXON\*) part. 2 clip units for one sterile box, 10 boxes in a carton.

The disposable loading unit can be used with the clip applier unit code 8886848700, 8886848798 and the extractor 8886848799.

### **Hernia Stapler**

#### **MULTIFIRE ENDO HERNIA\* 0°**

12mm single use preloaded stapler with titanium staples for herniorraphy procedures.

6 units per box

Order Color Code Code Description

■ 174027 blue MULTIFIRE ENDO HERNIA\* 0°

12mm,  $360^{\circ}$  rotating shaft single use preloaded stapler with titanium staples. The MULTIFIRE Endo Hernia\* stapler contains 10 titanium staples.

The instrument places one staple each time the instrument handle is squeezed.

The staple legs first penetrate the tissue or mesh and then fully form,

thus anchoring or approximating the tissue and/or the mesh.

The stapler can be loaded four times for a maximum of fifty firings with disposable loading units codes 174015 and 174007.

The length of the staple leg is approximately 4mm before closure and 1.5 when closed.

#### ■ 174025 black MULTIFIRE ENDO HERNIA\* 0°

 $12\text{mm}, 360^{\circ}$  rotating shaft single use preloaded stapler with titanium staples.

The MULTIFIRE Endo Hernia\* stapler contains 10 titanium staples.

The instrument places one staple each time the instrument handle is squeezed.

The staple legs first penetrate the tissue or mesh and then fully form,

thus anchoring or approximating the tissue and/or the mesh.

The stapler can be loaded four times for a maximum of fifty firings with disposable loading units codes 174015 and 174007.

The length of the staple leg is approximately 4.8mm before closure and 2.0 when closed.

#### **ENDO UNIVERSAL\* 65°**

12mm single use preloaded articulating (20°, 45° and 65° degrees) stapler with titanium staples for herniorraphy procedures.

6 units per box

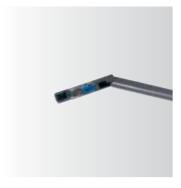

Order Color Code Code Description

#### ■ 173054 blue ENDO UNIVERSAL\* 65°

12mm, 360° rotating shaft and 20°, 45° and 65° degrees articulating single use preloaded stapler with titanium staples. The ENDO UNIVERSAL\* 65° stapler contains 10 titanium staples. The instrument places one staple each time the instruments handle is squeezed. The staple legs first penetrate the tissue or mesh and then fully form, thus anchoring or approximating the tissue and/or the mesh. The stapler can be loaded four times for a maximum of fifty firings with disposable loading units codes 174015 and 174007.

The length of the staple leg is approximately 4mm before closure and 1.5 when closed.

### **Hernia Stapler**

#### ■ 173052 black ENDO UNIVERSAL\* 65°

12mm, 360° rotating shaft and 20°, 45° and 65° degrees articulating single use preloaded stapler with titanium staples. The ENDO UNIVERSAL\* 65° stapler contains 10 titanium staples. The instrument places one staple each time the instruments handle is squeezed. The staple legs first penetrate the tissue or mesh and then fully form, thus anchoring or approximating the tissue and/or the mesh. The stapler can be loaded four times for a maximum of fifty firings with disposable loading units codes 174015 and 174007.

The length of the staple leg is approximately 4.8mm before closure and 2.0 when closed.

#### MULTIFIRE ENDO HERNIA\*

Disposable loading unit to be used with MULTIFIRE VersaTack\*, ENDO UNIVERSAL\*  $65^{\circ}$  and MULTIFIRE ENDO HERNIA\*  $0^{\circ}$  reloadable stapler with titanium staples for herniorraphy procedures.

6 units per box

Order Color Code Code Description

#### ■ 174015 blue MULTIFIRE ENDO HERNIA \* 4.0

Disposable loading unit for reloadable hernia mesh fixation stapler.

The disposable loading unit of the stapler contains 10 titanium staples 0.38mm x 0.51mm (0.015" x 0.020").

The staple span approximately 8.5mm before closure. The length of the staple leg is approximately 4mm before closure and 1.5 when closed.

The disposable loading unit can be used with stapler unit code 173054, 173052, 174027, 174025, 174021 and 174023.

#### ■ 174007 black MULTIFIRE ENDO HERNIA \* 4.8

Disposable loading unit for reloadable hernia mesh fixation stapler.

The disposable loading unit of the stapler contains 10 titanium staples 0,38mm x 0,51mm (0,015" x 0.020").

The staple span approximately 8.5mm before closure. The length of the staple leg is approximately 4.8mm before closure and 2.0 when closed.

The disposable loading unit can be used with stapler unit code 173054, 173052, 174027, 174025, 174021 and 174023.

#### **ENDO GIA\* UNIVERSAL**

Disposable reloadable laparoscopic articulating ( $22^{\circ}$  and  $45^{\circ}$  in both directions) linear cutting instrument handle.

3 units per box

Order Code Description

#### 030449

#### **ENDO GIA\* UNIVERSAL**

Disposable reloadable laparoscopic articulating ( $22^{\circ}$  and  $45^{\circ}$  in both directions) linear cutting instrument, shaft rotating ( $360^{\circ}$ ) for resection, transection and anastomosis. The stapler places two triple, staggered rows of titanium staples and simultaneously the knife divides the tissue in between.

The instrument is designed for multiple use during a single surgical procedure: it can be reloaded up to 25 times for a total of 25 applications.

The disposable loading unit can articulate at  $22^{\circ}$  and  $45^{\circ}$  in both directions by moving the proximal knob on the stapler.

Shaft diameter: 12mm., no light reflective shaft.  $360^{\circ}$  rotating shaft. The stapler can be used with single use loading unit ENDO GIA\* UNIVERSAL code 030450, 030451, 030452, 030453, 030454, 030455, 030456, 030457, 030458 and 030459.

The stapler can also be loaded with straight dlus ENDO GIA\* II codes 030416, 030418, 030419, 030426, 030425, 030422, 030423, 030412, 030414 and 030415.

#### **ENDO GIA\* UNIVERSAL XL**

Disposable reloadable laparoscopic long (XL) articulating ( $22^{\circ}$  and  $45^{\circ}$  in both directions) linear cutting instrumenthandle.

3 units per box

Order Code Description

#### **EGIA UNIVXL**

#### **ENDO GIA\* UNIVERSAL XL**

Disposable reloadable laparoscopic long (XL) articulating ( $22^{\circ}$  and  $45^{\circ}$  in both directions) linear cutting instrument, shaft rotating ( $360^{\circ}$ ) for resection, transection and anastomosis. The stapler places two triple, staggered rows of titanium staples and simultaneously the knife divides the tissue in between. The instrument is designed for multiple use during a single surgical procedure: it can be reloaded up to 25 times for a total of 25 applications.

The single use loading unit can articulate at  $22^{\circ}$  and  $45^{\circ}$  in both directions by moving the proximal knob on the stapler.

Shaft wire: 12mm., no light reflective shaft. 360° rotating shaft.

The stapler can be used with disposable loading unit ENDO GIA\* UNIVERSAL code 030450, 030451, 030452, 030453, 030454, 030455, 030456, 030457, 030458 and 030459.

The stapler can also be loaded with straight dlus ENDO GIA\* Straight codes 030416, 030418, 030419, 030426, 030425, 030422, 030423, 030412, 030414 and 030415.

#### **ENDO GIA\* Straight**

Disposable loading unit for laparoscopic linear cutting instrument for resection, transection and anastomosis with titanium staples.

6 units per box

Order Color Code Code Description

#### ■ **030416** grey ENDO GIA\* Straight 30 2.0

30mm straight single use loading unit.

The stapler places two triple, staggered rows of titanium staples (30mm) and simultaneously the knife divides the tissue in between.

Size of open staple: 3 x 2.0mm

Staple gauge: 0.21mm

Approximate B-shape closure: 0.75mm

The single use loading unit can be used with the handle unit code 030403,

030449 and EGIAUNIVXL.

#### ☐ **030418** white ENDO GIA\* Straight 30 2.5

30mm straight single use loading unit.

The stapler places two triple, staggered rows of titanium staples (30mm) and simultaneously the knife divides the tissue in between.

#### ■ 170002 black ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with SOFSILK\* 2-0 (coated braided silk), 18cm long.

#### ■ 170003 black ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with SOFSILK\* 0 (coated braided silk), 120cm long.

#### ■ 170004 black ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with SOFSILK\* 2-0 (coated braided silk), 120cm long.

#### ■ 170010 black ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with BRALON\* 0 (coated braided nylon), 18cm long.

#### **■ 170011** black ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with BRALON\* 2-0 (coated braided nylon), 18cm long.

#### ■ 170012 black ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with BRALON\* 0 (coated braided nylon), 120cm long.

#### ■ 170013 black ENDO STITCH\*

Disposable loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with BRALON\* 2-0 (coated braided nylon), 120cm long.

#### ■ 170050 violet ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 0 (coated braided syntethic absorbable suture), 18cm long.

#### ■ 170051 violet ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 2-0 (coated braided syntethic absorbable suture), 18cm long.

#### ■ 170052 violet ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 0 (coated braided syntethic absorbable suture), 120cm long.

#### ■ 170053 violet ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 2-0 (coated braided syntethic absorbable suture), 120cm long.

#### 170054 transparent ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra body suture. Preloaded with POLYSORB\* 0 (coated braided syntethic absorbable suture), 18cm long.

#### 170055 transparent ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 2-0 (coated braided syntethic absorbable suture), 18cm long.

#### 170056 transparent ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 0 (coated braided syntethic absorbable suture), 120cm long.

#### 170057 transparent ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 2-0 (coated braided syntethic absorbable suture), 120cm long.

#### ■ 170070 violet ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 3-0 (coated braided syntethic absorbable suture), 18cm long.

#### ■ 170071 violet ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 3-0 (coated braided syntethic absorbable suture), 120cm long.

#### 170072 transparent ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 3-0 (coated braided syntethic absorbable suture), 18cm long.

#### 170073 Undyed ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 3-0 (coated braided syntethic absorbable suture), 120cm long.

#### ■ 170090 violet ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 4-0 (coated braided syntethic absorbable suture), 120cm long.

#### ■ 170092 violet ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 4-0 (coated braided syntethic absorbable suture), 18cm long.

#### 170094 undyed ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 4-0 (coated braided syntethic absorbable suture), 18cm long.

#### 170096 undyed ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with POLYSORB\* 4-0 (coated braided syntethic absorbable suture), 120cm long.

#### ■ 173021 green ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with SURGIDAC\* 2-0 (coated braided polyester), 18cm long.

#### ■ 173023 green ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with SURGIDAC\* 2-0 (coated braided polyester), 120cm long.

#### ■ 173024 green ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with SURGIDAC\* 0 (coated braided polyester), 120cm long.

#### ■ 173026 green ENDO STITCH\*

Single use loading unit for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing. Preloaded with SURGIDAC\* 0 (coated braided polyester), 18cm long.

#### **ENDO STITCH\*** TRIPLE STICH\*

Disposable loading unit (3) for reloadable suturing and knotting device used for laparoscopic intra and extra corporeal suturing.

3 units per box/each unit contains 3 single stitches

.

Order Color Code Code Description

■ 170043 green ENDO STITCH\*

Single use loading unit (3) for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing.

Preloaded with 3 SURGIDAC\* 0 (coated braided polyester), 120cm long.

#### ■ 170041 green ENDO STITCH\*

Single use loading unit (3) for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing.

Preloaded with 3 SURGIDAC\* 2-0 (coated braided polyester), 18cm long.

#### ■ 170040 green ENDO STITCH\*

Single use loading unit (3) for reloadable suturing and knotting device for laparoscopic intra and extra corporeal suturing.

Preloaded with 3 SURGIDAC\* 0 (coated braided polyester), 120cm long.

#### ■ 170044 green ENDO STITCH\*

Single use loading unit (3) for reloadable suturing and knotting device for laparoscopic intra and eextra corporeal suturing.

Preloaded with 3 SURGIDAC\* 2-0 (coated braided polyester), 120cm long.

#### **ENDO CLOSE\***

Disposable device for suturing trocar site incisions.

12 units per box

Order Color

Code Code Description

#### **173022** ENDO CLOSE\*

Disposable device for suturing trocar site incisions.

#### SURGIWAND\* II 5mm

Disposable suction-irrigation device, 5mm shaft, NO adaptor for cautery 3 units per box

Order Color Code Code Description

#### **178081** SURGIWAND\* II

Disposable suction-irrigation device without tubing kit, 5mm shaft, 34cm long for use with the Nitrogen Pump System.

#### **178082** SURGIWAND\* II 5mm

Disposable suction-irrigation device with tubing kit for electronic pump system, 5mm shaft, 34cm long.

#### 178083 SURGIWAND\* II 5mm

Disposable suction-irrigation device with tubing kit for gravity feed system, 5mm shaft, 34cm long.

#### **SURGIWAND\* II**

Disposable suction-irrigation device, 5mm shaft, with adaptor for cautery 3 units per box

Order Color Code Code Description

#### **178091** SURGIWAND\* II 5mm

Disposable suction-irrigation device with cautery and L-hook tip, without tubing kit for use with the Nitrogen Pump System, 5mm shaft, 34cm long.

#### 178099 SURGIWAND\* II 5mm

Disposable suction-irrigation device with cautery and spatula tip, without tubing kit for use with the Nitrogen Pump System, 5mm shaft, 34cm long.

#### **178092** SURGIWAND\* II 5mm

Disposable suction-irrigation device with cautery, L-hook tip and tubing kit for electronic pump kit, 5mm shaft, 34cm long.

#### **178095** SURGIWAND\* II 5mm

Disposable suction-irrigation device with cautery, spatula tip and tubing kit for electronic pump kit, 5mm shaft, 34cm long.

#### **178093** SURGIWAND\* II 5mm

Disposable suction-irrigation device with cautery, L- Hook tip and tubing kit for gravity feed system, 5mm shaft, 34cm long.

#### 178094

#### **SURGIWAND\* II 5mm**

Disposable suction-irrigation device with cautery, spatula tip and tubing kit for gravity feed system, 5mm shaft, 34cm long

#### **DEXIDE\***

Endoscopic solutions 20 units per box

Order

Code Description

220-01 DEXIDE\* FRED\*

Anti-Fog Kit.

220-50 DEXIDE\* FRED\* II

Single-use Anti-Fog Kit Bulk Pack, economically packaged.

220-70 DEXIDE\* FRED\* Lite

Single-use Alcohol Free Anti-Fog Kit.

#### 220-90

Endo lube\* Seal and instrument Lubrication Kit.

#### **OMNIPORT\*\***

Disposable device for hand-assisted laparoscopic surgery (HALS) *3 units per box* 

Order

Code Description

#### ENDC 4 (50mm) OMNIPORT\*\*

50mm for use when the abdominal wall is less than 40mm thick (proximal and distal rings are 50mm apart)

#### ENDC 5 (80mm) OMNIPORT\*\*

80mm for use when the abdominal wall is between 40 and 70mm thick (proximal and distal rings are 80mm apart)
